Your assets in the best of hands

**You have achieved success. And now you want
to safeguard its rewards and watch them grow.
Over the long term, with a partner who
values security and understands your goals.**

Raiffeisen Privatbank Liechtenstein stands for solid investment policies with a long-term outlook. Since its founding in 1998, it has always stayed focused on private and trust banking.

Our clientele includes discriminating private and institutional investors who interact freely across borders. They appreciate our tight network of international relationships and the fact that we operate from Liechtenstein, a financial centre known as a safe haven. We use that status to uphold their interests.

In all our dealings, we value close relationships with our clients and security through prudent risk management. That means we shun speculative ventures, opting instead for well-founded investment strategies and sustained growth.

Our clients appreciate the character of our private bank. We build relationships based on partnership, trust and close collaboration: commitments that flourish over the long term.

Our judicious investment policies and individual client care ensure that your assets are in the safest place possible. And you benefit from a bank that increases value through its international scope and by building solid, close partnerships with its clients.

**Good
solid advice**
